

soccer pro safety:

Zuku puts you, the athlete, first.

We source our ingredients from the very best suppliers and employ stringent manufacturing methods to ensure our products are top quality and **100% safe for sports use.**

100% safe:

Zuku's Soccer Pro is totally safe and legal for competitive use and contains ingredients which are found naturally in your body. **None of the ingredients in Soccer Pro are on WADA's prohibited list.** This list can be viewed in full at WADA's website.

premium ingredients:

Soccer Pro is produced with the finest ingredients, all of which are rigorously quality checked by their suppliers.

We demand Certificates of Analysis for each ingredient and have **full traceability of all materials** in the product. In our production facility, we perform analytics on our active ingredients before they are released for manufacturing.

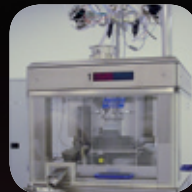

L-Carnitine C of A

Analytics report for L-Carnitine

cGMP production:

Soccer Pro is produced in Switzerland to **cGMP standards** (*current Good Manufacturing Practices*). This means it is manufactured in a safe and clean environment with no risk of contamination. Our machinery is maintained by a team of specialists who conduct thorough sanitary checks before the machine's use and an intensive cleaning procedure after.

Fette tableting machine

Soccer Pro is manufactured to cGMP standards

quality controls:

Before the finished product leaves the manufacturing facility, it is subject to a final set of quality control tests to ensure it is of the requisite high standard.
